PROFESSIONAL SUMMARY

Product Engineer bridging the gap between systems architecture and production code. With 10+ years of experience building digital products, my core strength lies in full-lifecycle execution: from UX and systems design down to production-level code.
Specialized in agentic AI workflows (Claude API, Model Context Protocol), LLM orchestration, and modern full-stack development (React, TypeScript, Node.js, Python, Supabase). Focused on solving complex business problems by shipping scalable, auditable, and resilient software that combines design precision with solid software engineering.

PROFESSIONAL EXPERIENCE

Shape Creative Studio

Lead Product Engineer | *August 2022 – Present*
Lead technical and product strategy for B2B SaaS solutions, owning the entire stack from database modeling to frontend deployment.

- **Core Architecture & SaaS Development:** Architected and launched *IntelliResearch*, a qualitative research SaaS platform built on Firebase and Supabase, integrating automated LLM data analysis pipelines.
- **Agentic Workflows & AI Tooling:** Engineered autonomous agent workflows for UI audits and automated code refactoring using Claude Code and the Model Context Protocol (MCP), cutting manual QA cycle times.
- **Infrastructure & DevOps:** Deployed and maintained bare-metal Linux servers running containerized Docker workloads to support high-reliability automated media streaming pipelines.
- **AI Product Integration:** Designed and built native macOS AI assistants and automated billing systems powered by LLMs.

APLICA (Entel)

Design Systems Engineer | *July 2024 – December 2024*

- Served as technical owner of the enterprise Design System, ensuring strict parity between Figma component libraries and production frontend code.
- Partnered directly with frontend engineering squads to optimize retail conversion funnels through high-performance, accessible component architecture.

Emergya Chile (General Treasury of the Republic – TGR)

UX Engineer | *July 2023 – January 2024*

- Implemented core architectural and accessibility (WCAG) improvements across internal platforms for Chile's General Treasury.
- Translated complex user research findings into scalable interface systems, directly improving usability for 50,000+ public-sector end users.

El Universal

Frontend Developer | *August 2012 – March 2017*

- Engineered high-traffic web interfaces focused on performance and responsiveness, establishing foundational expertise across the design-to-code continuum.

TECHNICAL SKILLS

- **AI & Backend:** Python, Node.js, LLM Orchestration (Claude API, OpenAI), Agentic Workflows (Model Context Protocol / MCP), PostgreSQL, Supabase, Firebase.
- **Frontend & Architecture:** React, TypeScript, JavaScript, HTML5/CSS3, Tailwind CSS, Component-Driven Architecture, Design Tokens.
- **DevOps & Infrastructure:** Docker, Linux (Ubuntu Server), Git/GitHub, CI/CD, Deployment Automation.
- **Product & Design:** Advanced Figma, Design-to-Code Pipelines, Design Systems, Accessibility (WCAG 2.1 AA).

EDUCATION & CERTIFICATIONS

- **Master's Degree in Project Management** | IMF Smart Education *(2024 – In progress)*
- **Artificial Intelligence for Business** | Udemy *(2023)*
- **Associate Degree in Graphic & Web Design** | IUTIRLA *(2000 – 2004)*

Ajustes clave aplicados:

1. **Terminología de nicho:** Traduje términos técnicos a convenciones estándar del ecosistema (*LLM orchestration*, *Model Context Protocol*, *design tokens*, *parity*).
2. **Impacto cuantificable:** Se mantienen y destacan los números clave (50,000+ usuarios, 10+ años de trayectoria) para asegurar relevancia en escaneo automático.
3. **Equilibrio Design / Engineering:** El perfil comunica claramente que programas a nivel de producción y no te quedas solo en el prototipo visual.
